

**Are you
ready to
kiss your
healthcare
goodbye?**

Your Healthcare Is Under Attack!

Personal injury lawyers and uninjured plaintiffs are gaming our legal system in an attempt to get rich. Their never-ending lawsuit schemes are taking compensation away from those who are truly injured and destroying our healthcare system in the process.

No part of our healthcare system is safe from attack. Everyone from doctors, to hospitals to the makers of our medicines is being sued.

What's at risk?

- Your doctor.
- Your healthcare choices.
- Your access to care.
- Justice for injured patients.
- The healthcare we all depend upon.

Visit www.sickoflawsuits to learn more about the threat to your healthcare and what you can do to fight back.

Sick of Lawsuits (www.sickoflawsuits.org) is a nonpartisan, grassroots campaign to educate the public about the negative impact of lawsuit abuse and stop lawsuit abuse from destroying our healthcare system.
